Studio Scotland

Studio Scotland was founded nearly 25 years ago by lens man Stewart Menelaws whose skill creating beautiful images and unusual lighting techniques was translated from stills to moving pictures.

With Head of Production Deborah Forrest and Sound Engineer Keith Elman, Studio Scotland produce factual programming for broadcast around the world and movies for international release.

Their latest theatrical doc 'The Daniel Project' is the definitive look at Bible Prophecy and the predicted coming apocalypse and is distributed by Mercury Media. 'The Daniel Project' is already causing a stir as it poses – and answers – the question, “what on earth is happening”...
